

Kutupsan Lighting Design

BESPOKE LIGHTING PRODUCTION FOR
ARCHITECTURE FIRMS SINCE 1985.

ISTANBUL · TURKEY

We treat light as an architectural layer

Lighting is not just a product; it is an architectural layer that builds the perception of space. We transform design intent into a manufacturable, site-specific object.

From concept to product

01

Concept Development

We technically analyze design intent and develop site-specific solutions.

02

Bespoke Production

We align size, form, and material choices with the project's architectural language.

03

Technical Solution

We plan LED, optics, and mounting details integrated with the architectural process.

Clarity at every step

-
- | | | |
|----|--------------------|--|
| 01 | Discovery | Brief, plan and space reading |
| 02 | Development | Design, technical drawing and sampling |
| 03 | Production | Controlled manufacturing and quality control |
| 04 | Delivery | Packaging, shipping and installation support |
